SPC WALL PANELS

INNOVATIVE WALL TILE SOLUTION

Stone and wood looks, without the tiles.

FloorLaBs SPC wall panels have a rigid stone-polymer core and a vivid HD decor under a protective wear layer. One panel covers 2.69 m², with no grout lines and no tiling. Ideal for bathrooms, showers, kitchens, hotels, offices and retail.

- 100% waterproof
- Easy installation
- Practical & hygienic
- Budget friendly
- HD stone & wood decors
- Lifetime limited warranty

IN REAL LIFE

Installed and in stock.

SHOWROOM & STOCK

See and feel the panels.

INSTALLATION

Up in a few hours.

1. Let the panels acclimatise for 24 hours, especially after big temperature changes.
2. Measure the wall and the panels, and cut to size as needed.
3. Make sure the wall is flat: no bumps, humps or protruding screw heads.
4. Dry-fit each panel to check the cut, and mark the joint lines on the wall with a pencil.
5. Apply a thick bead of heavy-duty construction adhesive 2.5 cm from the panel edge, a second bead 7.5 cm inside it, and lines every 20 cm in the middle. One panel takes about 3 cartridges (800 ml).
6. After the first panel, use tile levellers every 50 cm to keep panels aligned.
7. Press firmly along all adhesive lines straight away, with a tool that will not scratch the surface.
8. When the adhesive has cured, remove the levellers, tape the joints and fill joints and inside corners with silicone. Remove the tape.
9. Finish outside corners with a metal L-profile.

Tip: FloorLaBs PU construction adhesive and multi-purpose silicone are made for this job.

DELIVERY

Packed flat, shipped safe.

Panels are packed flat on reinforced pallets and ship by full truck or container, mixed with flooring and accessories if you like.
